

ORACLE CONSULTANCY · CHIEF-OF-STAFF SYSTEM

Quick Reference

The one-page-at-a-glance card — routes, statuses, everyday how-tos and operator commands.

Companion to the Operations & Master Reference Manual · V3 · 18 June 2026

Quick Reference

Keep this handy. For the full explanation of anything here, see the Operations Manual.

Signing in

Who	Where	With
Owner	<code>/login</code> → Command Centre tab	Owner password (+ owner identity if set) or passkey
Staff / Manager / HR / Director	<code>/login</code> → Staff Login (or <code>/portal/login</code>)	Name/email + personal password, or passkey

Getting around

- **Nav pill** (bottom, all screens): Home · Director Brief · Task Management · Workbook · Chat · HRMS · + · Search · Theme.
- **HRMS icon** opens the "Go to" launcher — every secondary page.
- + = the action for the current page · **Search** = jump anywhere / Ask ORI.

Pages at a glance

Annual	28 days / 12 mo
Sick	126 / 36 mo (63 full + 63 half)
Maternity	84 days
Paternity	3 days
Compassionate	4 days

Working days Mon–Sat minus public holidays.

Everyday how-tos

To...	Do this
Create a task	Press + on Home/Tasks → title, company, priority, assignees.
Add a person	<code>/people</code> → add; an onboarding + compliance checklist is created automatically.
Upload a document	<code>/documents</code> → "Add several" for bulk; it auto-links to the compliance checklist.
Capture a meeting	<code>/meeting</code> → dictate/notes → Generate minutes → Extract action items → bulk-create tasks.
Approve leave	<code>/hrms/leave</code> (admin) or portal home (managers).
Mark attendance	<code>/hrms/leave</code> → Attendance → brush the grid, or "mark all Present today".
Issue a letter	<code>/letters</code> → pick template → edit → Draft → Issue (freezes letterhead + ref).
Send the brief	<code>/brief</code> → WhatsApp / Email / Copy, or print to PDF.
Chase a compliance gap	Needs-attention row → "Chase" → drafts a reminder in the Outbox.
Archive someone	Person drawer → archive; offboarding checklist + asset auto-return run.

Operator commands (terminal)

Back up the database	<code>npm run db:backup</code> → <code>backups/</code>
Restore	<code>npm run db:restore -- <folder></code>
Apply migrations	<code>npm run db:migrate</code> (back up first)
Type-check	<code>NODE_OPTIONS=--max-old-space-size=4096 npm exec tsc -- --noEmit</code>
Run tests	<code>npm test</code>

GOLDEN RULES

Run a backup before any migration. Never `rm -rf .next` while the dev server is running. Every number in the UI is clickable — observe, then act.

Person types

local staff · expat · outsider · candidate — each drives its own document checklist.

Portal roles

staff · manager · hr · director (set in Settings → Staff portal access).
