

ORACLE CONSULTANCY · CHIEF-OF-STAFF SYSTEM

What We've Built

A complete inventory of everything delivered — module by module — plus what's wired-but-pending and what's planned.

Delivery register · V3 · 18 June 2026 · Companion to the Operations Manual

What we've built

A delivery inventory

This is the running record of what the system can do today. It replaced an Excel workbook with a single command centre covering tasks, people, compliance, meetings, communications and intelligence across all seven companies.

● **Live** — built and in use ● **Pending** — built, needs an owner action to switch on ● **Planned** — designed, not built

Core — tasks, companies, home

Capability	Status
Task capture & tracking with company codes, statuses, priorities, categories, assignees	Live
Per-task timeline + full audit history; portfolio-wide activity feed	Live
Home command centre (Overview · Companies · Tasks), health ring, glanceable counts	Live
Companies hub = reference-data centre (Companies · Departments · Sites · Roles, with merge)	Live
Company profile with board-level governance (cap table, owners, signatories, resolutions, risks, decisions)	Live

People & HR records

Rich person records (HR profile, work site/residence, computed staff IDs, person types)	Live
Lifecycle automation (onboarding/offboarding checklists, asset auto-return, probation tools)	Live
Reporting lines + bulk "also reports to"; per-person History (audit)	Live
Cockpit drawer with Leave tab (balances, requests, attendance); printable EN/Swahili data form	Live

Documents & compliance

Documents library; per-person & per-company compliance checklists scoring to 100%	Live
Auto-link docs to requirements; verify loop; review/expiry dates; lapse detection	Live
Bulk multi-file upload, recency-aware dedup, compilation detect/split, renewal lineage	Live
Compliance audit trail + history; portfolio compliance CSV export; "Chase" renewal drafts	Live
Smart intake (Inbox): paste/file bundles → file docs + enrich profile (blanks-only, reviewed)	Live

HRMS suite

Tax & Legal — recurring statutory/legal obligations with cadence + safety net	Live
Organogram — ELK portfolio flowchart (multi-parent), per-company trees, by-department	Live
Assets & Vendors — assign/return, history, PDF register + handover receipts; vendor register	Live
Leave & Attendance — ELR-accurate leave + writable attendance grid & self-check-in	Live
Pipeline (applications in progress) + Commitments register (notice-by tracking)	Live
OECR stock control + OCR cleaning registry	Live

Meetings, letters & brief

Meeting Workspace — voice notes, clean, minutes, decisions/risks, action items → tasks	Live
Workbook (Meetings · Notes · To-do)	Live
Director Brief — shareable portfolio report + print-to-PDF	Live
Letters — branded PDF letters, Draft→Issue, per-company letterheads	Live

Communications & outreach

Chat — DMs + groups, real-time, read receipts, portal twin (primary nav tab)	Live
Outbox — reminder/renewal/director message drafts with WhatsApp/email/SMS deep-links	Live
Email sending (Gmail SMTP / Resend) — wired	Pending creds
WhatsApp automation (Twilio) — sandbox proven	Pending go-live

Staff / Manager / Director portal

Staff portal — own tasks, documents, attendance self-check-in, leave, onboarding, equipment	Live
Manager view — team attendance, leave approvals, team roster, task creation	Live
Director operator surface — board brief, create tasks/events, draft messages	Live
Accessibility controls (text size, motion, density); error boundaries; hardening sweep	Live

Intelligence

ORI assistant — grounded Q&A over tasks/meetings/docs/people, cites sources	Live
Voice intelligence — "speak rough, save polished" in EN/SW/HI/GU; voice dictionary	Live
AI safety harness (retry/timeout, JSON guards, hallucination checks); AI master switch	Live
Semantic / hybrid search (pgvector + FTS, multilingual interim) — opt-in	Pending setup
Durable multilingual search container (Swahili/Hindi/Gujarati)	Planned

Security & foundation

One-password admin gate + per-person portal logins; owner identity 2nd factor	Live
Passkeys (Face ID / Touch ID / Windows Hello / fingerprint) for owner & staff	Live
Portable DB backups + restore; Supabase cloud backups; Sentry error monitoring	Live
56 DB indexes, 42+ safety tests, Dependabot + pinned overrides (clean audit)	Live
Onboarding tours — guided first-run walkthroughs + feature spotlights (Phase 1)	Live
Announcements noticeboard (A1–A3)	Awaiting review

OWNER ACTIONS TO UNLOCK PENDING ITEMS

(1) Add email + WhatsApp provider credentials in Vercel; (2) run the one-time semantic-search setup (`SEMANTIC_SEARCH.md`) + decide on the multilingual container (~£3–7/mo); (3) enable GitHub Dependabot security

alerts; (4) review & ship the Announcements noticeboard.

BUILT ON ONE PRINCIPLE

Reuse, don't duplicate — Documents power compliance, tasks/todos power checklists, OECR underpins assets, Outbox powers messages, Home/Brief surface signals. One design language (Aurora) across every screen.
